Oracle Corporation   06 December, 2020

Sir/Madam,

Firstly, a bit about me: I am a 3rd-year Civil Engineering undergraduate at IIT Bombay with a keen interest in coding. I am very passionate about web & app development apart from being a Machine Learning enthusiast, and wish to intern at Oracle Corporation during the Summer of 2021 (between 13 May & 13 July).

I feel that I have a decent knowledge of development using Angular, Django & PHP, which can be exemplified by the various projects in my resume. I have also designed some websites and apps by leveraging different frameworks such as Jekyll, Larval & NodeJS, as well as managed MySQL databases. During my winter internship at Greatfour Systems (Dec 2019) at Hyderabad, I was responsible for automating the process of edge detection in image using OpenCV and NumPy. I also have the experience of working with PDF libraries of Python such as Tabula & Excalibur.

Currently, I am looking for an internship opportunity that would allow me to enhance my programming and problem-solving skills and I feel that Oracle would definitely be a great opportunity for me in doing so. Since I stay in India, I am open to working remotely also. I am confident that my sincerity and willingness to learn and adapt to new situations would qualify me for your consideration. I have also attached my resume for your referral. Looking forward to hearing from you to discuss the internship opportunity in detail.

Regards,

Rishabh Arya
